Water Comm Strat DOGGR UIC draft Feb 3 2015.doc (bpm edits).doc

This is great. I suggest some edits on the background and a few Q/A sections.

Here is the latest Comm Strategy. Let us know what comments you have, and additional details that would be helpful to include.

Thanks,
David

Subject: Comm strategy - CA UIC

Importance: High

Hey folks – As we continue to field questions about DOGGER and the imminent deadline for their plan, can we get an updated set of briefing materials by COB today for Jared with the most current data, FAQs, talking points, etc.?

Jared has also asked for a broader set of information about groundwater and drinking water resources in CA, the number of aquifers, injection wells, relative depths of injection aquifers and drinking water aquifers, etc. that Suzanne worked with Mike and David on yesterday. We'll need to flesh that out as soon as possible so that we have necessary context.

More specifically, we need to be able to talk about how we will review the state's submission, any response we plan on (letter of formal approval, etc.), any further actions we will take if the submission is not up to par, is late, or if they don't meet milestones, etc.

Thanks-

Kelly
